SEAMLESS IMPLEMENTATION

With ExponentHR, we use a time-tested, repeatable implementation. That's because we use a tested and repeatable implementation methodology that helps define your organization's unique HR needs and configures a system to work flawlessly from day one.

We start by setting you up with an implementation coordinator who stays with you throughout the process, from discovery to system planning and testing all the way to your first payroll runs. Then we help you move as fast as your business demands. Acquiring a new company? Need more detailed and flexible reporting? We can help your HR and payroll keep pace.

Best of all, there's no limit to the number of support calls your people can make.

"What really matters is who you work with and how well you're supported. Their support is exceptional."

BOOST PRODUCTIVITY ON A SINGLE PLATFORM

Human resources are the engine of your business, and you need an HR system that's powerful enough to fuel its success. That's why ExponentHR built its software on a single data platform, so you can put all your HR info and functions in one place—from payroll and benefits to compliance and recruiting.

A single data platform means you only enter your data once, eliminating duplicate work. Our ability to configure our platform to your business reduces recurring manual payroll run edits and spreadsheet management. The result is an HR and payroll platform that delivers exponential accuracy, efficiency, and savings.

"With ExponentHR, our payroll processing went from being a two-day process down to a half-day process."

From health insurance and 401Ks to paid time off and more, benefits are a big deal for your employees. Too often, though, signing up for and managing them can be a pain. Fortunately, ExponentHR's single data platform streamlines the process from start to finish.
